PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented computer science student with hands-on experience in Generative AI, AWS operations, wireless robotics, and machine learning. Skilled in programming, exploratory data analysis (EDA), and hardware integration with IoT components, LLM integration, prompt engineering, vector database ingestion, and building AI-driven lead generation pipelines. Proven ability to work on interdisciplinary projects, combining software and hardware. Eager to contribute to innovative tech solutions through internships or full-time roles in the fields of AI/ML, and cloud computing.

EDUCATION

INDUS UNIVERSITY, Ahmedabad, Gujarat,
B.Tech in Information Technology | GPA: 9.4/10

Jul 2024 – May 2028

WORK EXPERIENCE

AWS, Cloud Intern

Jun 2025 – Jul 2025

- Managed AWS-based systems for real-time data operations.
- Hands-on experience with EC2, IAM, Firehose, S3, and Apache Flink.
- Designed AWS cloud infrastructure, including real-time streaming with Kinesis, and data storage pipelines.
- Collaborated with teams to deploy and monitor cloud services, with 99% uptime efficiency.

Wireless Robotics, Robotics Intern

Jun 2025 – Jul 2025

- Developed robotic projects integrating Arduino with wireless RF/Bluetooth modules.
- Programmed motor drivers for robotic tasks: forward, reverse, turning, and stopping.
- Debugged C code for embedded systems, ensuring real-time response accuracy.

Productimate AI Solutions, Gen AI Intern

Aug 2025 – Nov 2025

- Built AI lead pipelines (FastAPI, GPT-4.1, LangChain) with pagination, filtering, deduplication, and ZeroBounce integration.
- Developed confidence scoring using field comparison and OpenAI embeddings with PostgreSQL/Prisma backend.
- Built RAG ingestion pipeline embedding multi-source tenant data asynchronously into a vector database.
- Designed DAG-orchestrated contact finder with parallel discovery, email pattern inference, and verification.

SKILLS

Languages: Python | C | C++ | SQL

Libraries/Tools: Pandas | NumPy | Scikit-learn | Matplotlib LangChain | FastAPI | Pydantic | BeautifulSoup

Platforms: AWS | Colab | Arduino | Prisma ORM

Concepts: Retrieval-Augmented Generation (RAG) | Prompt Engineering | Vector Embeddings | Semantic Similarity | Confidence Scoring | DAG Orchestration | Async Processing | API Key Rotation

CERTIFICATIONS

- AI and machine learning - Pregrad [🔗](#)
- AWS Cloud Fundamentals - IITE, Indus Institute of Technology & Engineering [🔗](#)
- Wireless robotics - IITE, Indus Institute of Technology & Engineering [🔗](#)
- Advanced Drone Technology (Air Taxi) - Bharat Space Education & Research Centre (BSERC) [🔗](#)
- Gen AI Trainee – Productimate AI Solutions [🔗](#)

PROJECTS

Salary prediction using machine learning [🔗](#)

May 2025

- Built a salary prediction model using machine learning with 97% accuracy (R^2 score), leveraging EDA and feature engineering on real-world data.

Smart Crop Recommender (Streamlit Web App) [🔗](#)

Jul 2025

- Developed a machine learning-based web application using Python and scikit-learn that recommends the most suitable crop based on soil nutrients (N, P, K) and environmental conditions (temperature, humidity, pH, rainfall)
- Deployed successfully on **Streamlit Community Cloud**.
- **Tech Stack:** Python, scikit-learn, pandas, Streamlit, Jupyter Notebook.
